Our Modular Wall can be combined with over 40 different panel types!

THE MODERN AND SOPHISTICATED SOLUTION FOR CREATING A DESIGN.

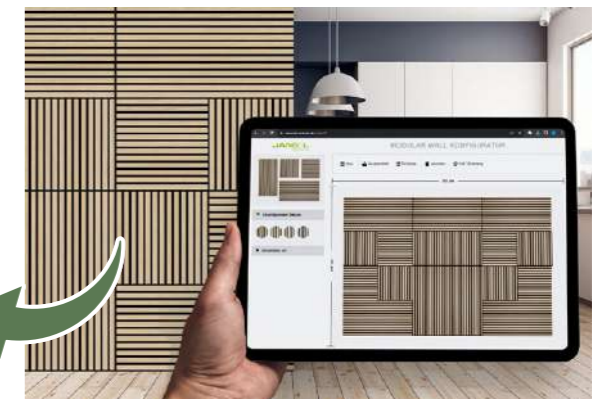

DESIGN YOUR WALL AS YOU LIKE - MODULAR AND CREATIVE

With the Modular Wall series from JANGAL, you can design your walls entirely according to your liking.

The panels are available in different sizes, colors and materials. This makes it possible to adapt the wall design perfectly to your interior and the respective room. The panels can be installed both vertically and horizontally. They can be used to cover large surfaces or to visually enhance specific areas. This means there are no limits to the design of your wall.

THE CONFIGURATOR

Create your wall according to your individual needs and bring your visions to life!

THE VISUALIZER

Use our Visualizer to see what your home could look like with our panels. Upload a room picture, select a panel and be inspired!

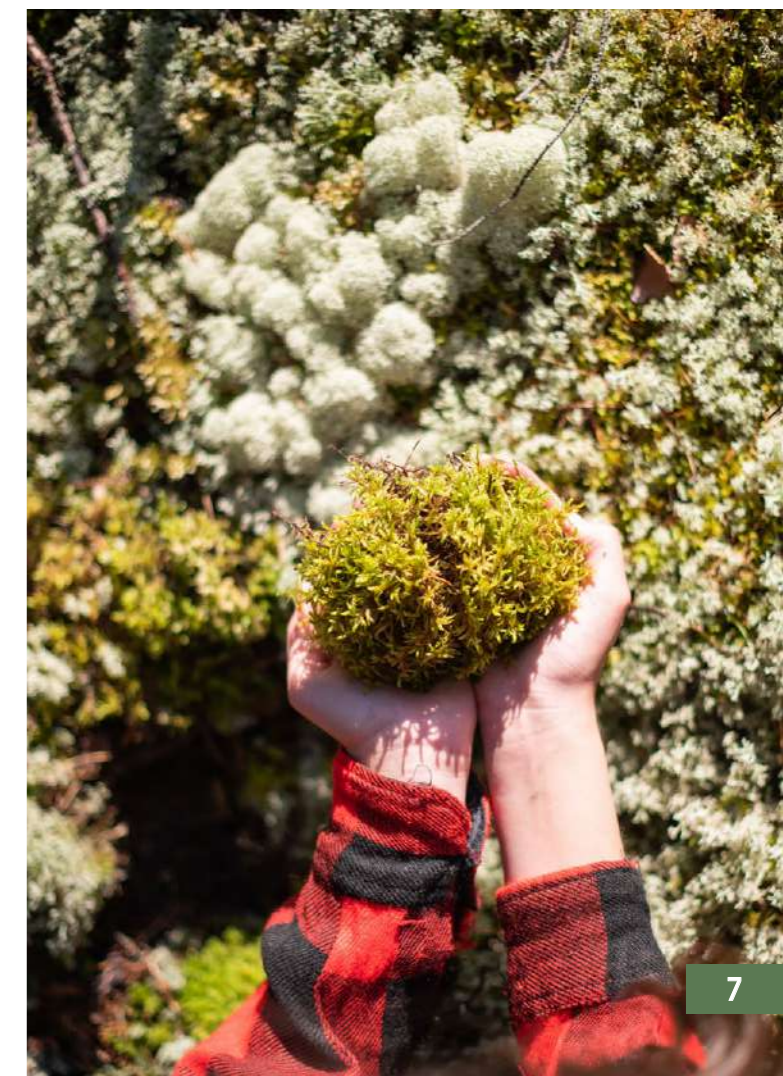

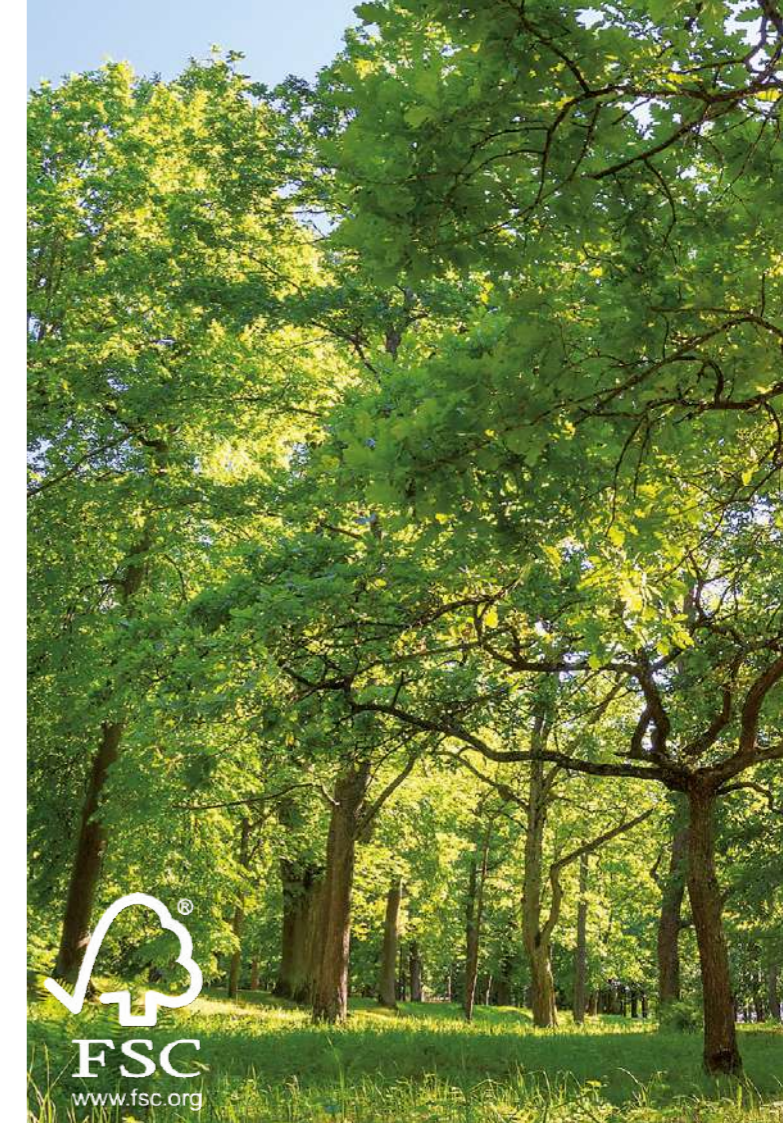

RESPONSIBILITY BY USING SUSTAINABLE MATERIALS

In addition to perfect room acoustics and interior design, sustainability is particularly important to us. That's why we at JANGAL attach great importance to using sustainable materials in our production.

Our acoustic felt is made from recycled PET materials and the wood we use comes from sustainable forestry. As a result, we not only guarantee sustainable, but also healthy living within your own four walls.

For our moss panels, we only use naturally grown moss that has been carefully selected and harvested in sustainably managed regions. The moss is carefully harvested by hand and cleaned and preserved using a special process. As a result, our moss panels do not fade and retain their natural appearance even after many years. We also use thuja tree fibers or coconut fibers for our flora panels. We do not use any ingredients that are harmful to health and consciously focus on tested quality.

Discover
the innovative
Connector

THE CONNECTOR WITH A „WOW“ EFFECT

Compared to other products, the acoustic panels from JANGAL have a special feature: the specially developed connector allows installation over the entire height of the wall without visually disturbing joints. This makes seamless transitions possible, resulting in an aesthetically pleasing overall appearance.

The connector comes with Jangal acoustic panels and escape standard acoustic panel issues. Quick & easy to install, endless freedom in design and sustainable Materials. Combination of different panel sizes? Possible for the first time. This opens up endless design possibilities.

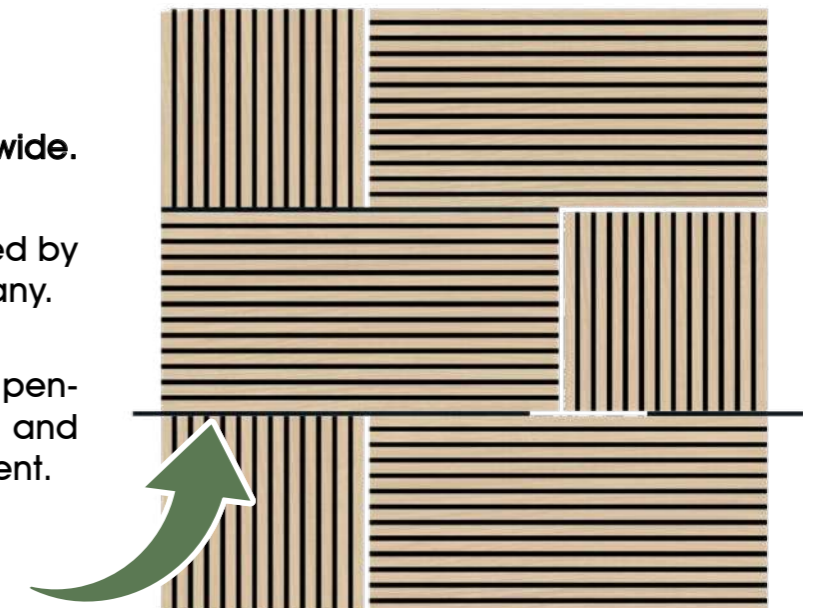

Design registered EU-wide.

The system is protected by utility model in Germany.

A European patent is pending for the system and method of arrangement.

“Combination of different panel sizes and panel types possible for the first time.”

GERMAN DESIGN AWARD WINNER 2024

Our modular acoustic panel system, which is characterized by its simple installation, its diverse design options and its sustainable materials, is German Design Award Winner 2024 in the category „Home Textiles and Home Accessories“.

The German Design Award recognizes outstanding and exemplary design achievements in a specific category. Only products that demonstrably stand out due to their design quality are invited to take part in the competition. All awards are determined in a multi-stage judging process.

REPEATEDLY HONOURED: THE MODULAR WALL

The Modular Wall was once again honoured with the ICONIC AWARD - INNOVATIVE ARCHITECTURE in the 'PRODUCT - INNOVATIVE MATERIAL' category. The ICONIC AWARDS 2024 honour pioneering architectural projects and sustainable solutions. In a competition with high-calibre competitors, the Modular Wall was able to prove its excellence and successfully assert itself. This award once again underlines the Modular Wall's leading position and innovative strength.

“ We are incredibly proud and are delighted about the great appreciation of our Modular Wall.

SMART ACOUSTIC PANELS

Whether individually as a design element or both formats in combination – a beautiful and interesting design can be easily created on walls and ceilings without any prior knowledge. Thanks to its practical size and light weight, the acoustic panel becomes a flexible design element and offers countless design options.

SOLID ACOUSTIC PANELS (MDF)

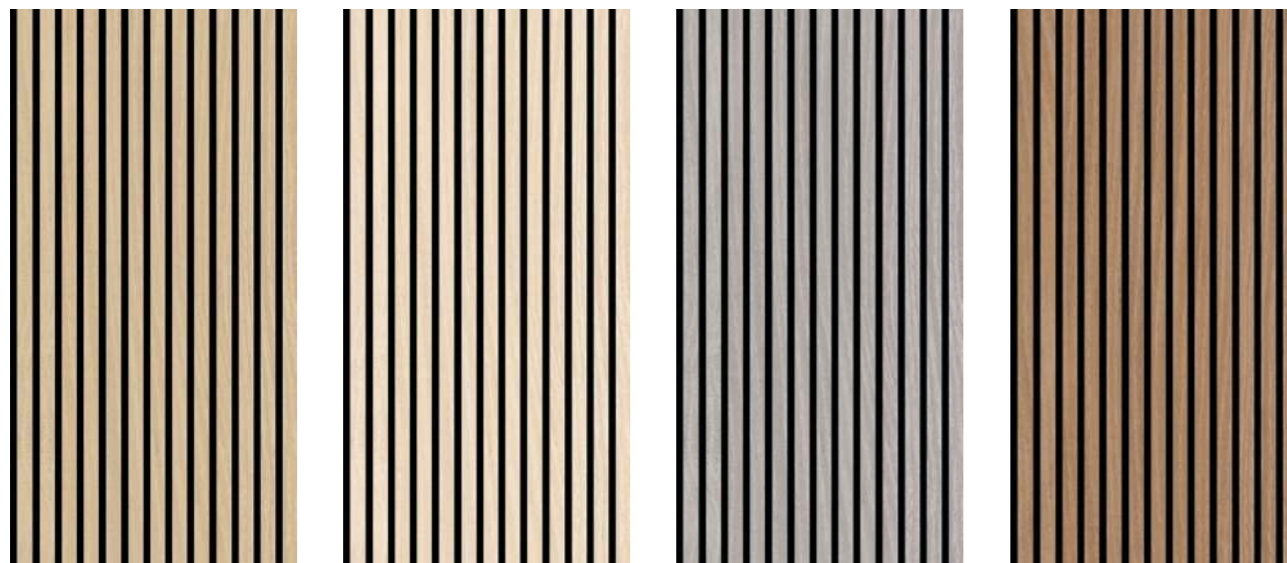

Take your interior design to the next level with the Solid Acoustic Panels. The established Modular Wall offers endless design possibilities, now with enhanced functionality thanks to 9 mm thick MDF slats on a 6 mm thick, sound-absorbing rPET felt. The unique depth of the MDF slats refracts and absorbs sound while you create a harmonious ambience with environmentally conscious materials. Our high-quality workmanship guarantees sustainability without compromising on quality.

STONE PANEL

A layer of real stone on the wall brings the natural beauty of nature indoors and creates a harmonious connection between the outside and inside worlds. The unique texture and variety of colours of the stone lends any room a timeless elegance. As a modular addition to the rest of the range, it fits perfectly into modern interior design concepts and provides a luxurious yet natural accent.

NATURAL BEAUTY FOR YOUR HOME

Our plant panels are the perfect solution for anyone who wants to enhance their home with nature. All panels add a refreshing touch to your interiors and create a relaxing atmosphere.

We only use high-quality plants that look and feel realistic. They are available in a variety of colors and designs to help you find the perfect wall covering for whatever style you have in mind.

They are easy to install and can be fitted to any wall in just a few simple steps. So you can create a new look for your home quickly and easily.

Convince yourself of the natural beauty of our panels:

The combination of different panels creates a unique and personalized wall design.

The different panel types complement each other perfectly and form a harmonious ensemble.

The panels create depth and give the room a new dimension.

Green plants contribute to a better sense of well-being.

Our panels require no watering, no sunlight and no fertilizer.

You can find the assembly instructions on our website jungal.eu/en/downloads/

MOSS

Furnishing your home beautifully and healthily has never been easier than with our real moss panels from sustainably managed regions. The 520 x 520 mm size is particularly practical, eye-catching and extremely stylish. There are no limits to creativity thanks to the wide range of possible applications. With its low installation height, the panel is ideal for wall decoration. Depending on the size of the area to be decorated, this can be done in a short time. The natural moss panels will enchant your senses.

DESIGN MOSS

Inspired by the beauty of nature, we have developed design moss panels that give your home or office a fresh touch. You can easily create your own moss wall or moss pictures for your interior design with this incredibly realistic-looking moss. It is particularly easy to maintain and does not need to be watered or fertilized. It is long-lasting and can also be used in locations with poor lighting conditions.

NATURE DESIGN FLORA

The Modular Wall Nature Design Flora panel in 520 x 520 mm format is a unique and impressive plant composition. It combines several plant species in a harmonious interplay. Whether thuja tree fibers or coconut fibers – all panels create a lush and vibrant green that adds depth and atmosphere.

They bring color and life to the room and are particularly suitable for rooms where there is little light. The panels are designed in such a way that they also look good in darker areas.

DESIGN FLORA

Nature is full of beauty and harmony. For this reason we have developed Design Flora panels. They are a piece of nature that enchants us in the middle of everyday life. They are the ideal way to sit back and relax. If you want to add a touch of nature and exoticism to your home or office, our naturally designed panels are the perfect choice. The Design Flora panels are available in 520 x 520 mm format and can be mounted on any wall and are very easy to clean.

INSPIRATIONS

Plant walls are versatile and can be decorated in various ways.

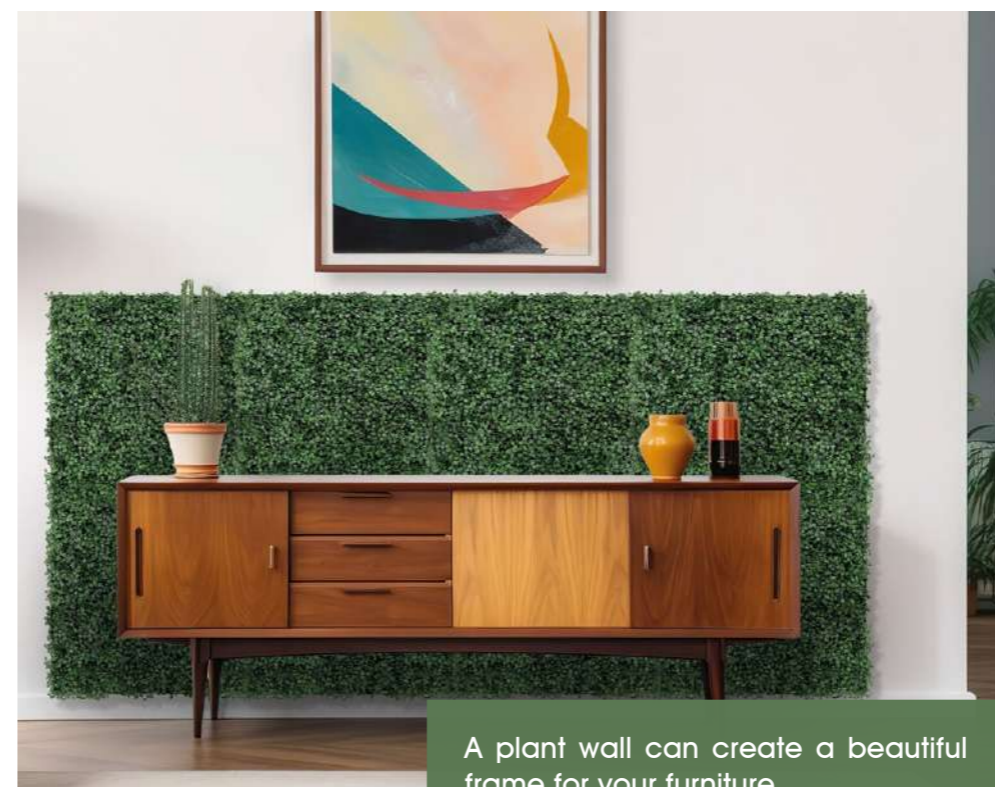

The combination of a plant wall with our Modular Wall wooden panels creates great patterns and colors. This allows you to design your room in a completely personalized way.

Several plant or wooden walls can visually enlarge the room and create a cozy atmosphere.

Shelves in front of a plant wall create a real eye-catcher.

A plant wall can create a beautiful frame for your furniture.

For those who prefer a more discreet look, small areas can be designed to add green accents to the room.
